

# CALLISTO status report/newsletter #69

## First light observed at Graz University, Austria

Short after installation and configuration of the instruments at university of Graz, they got first light with their Callisto instrument.

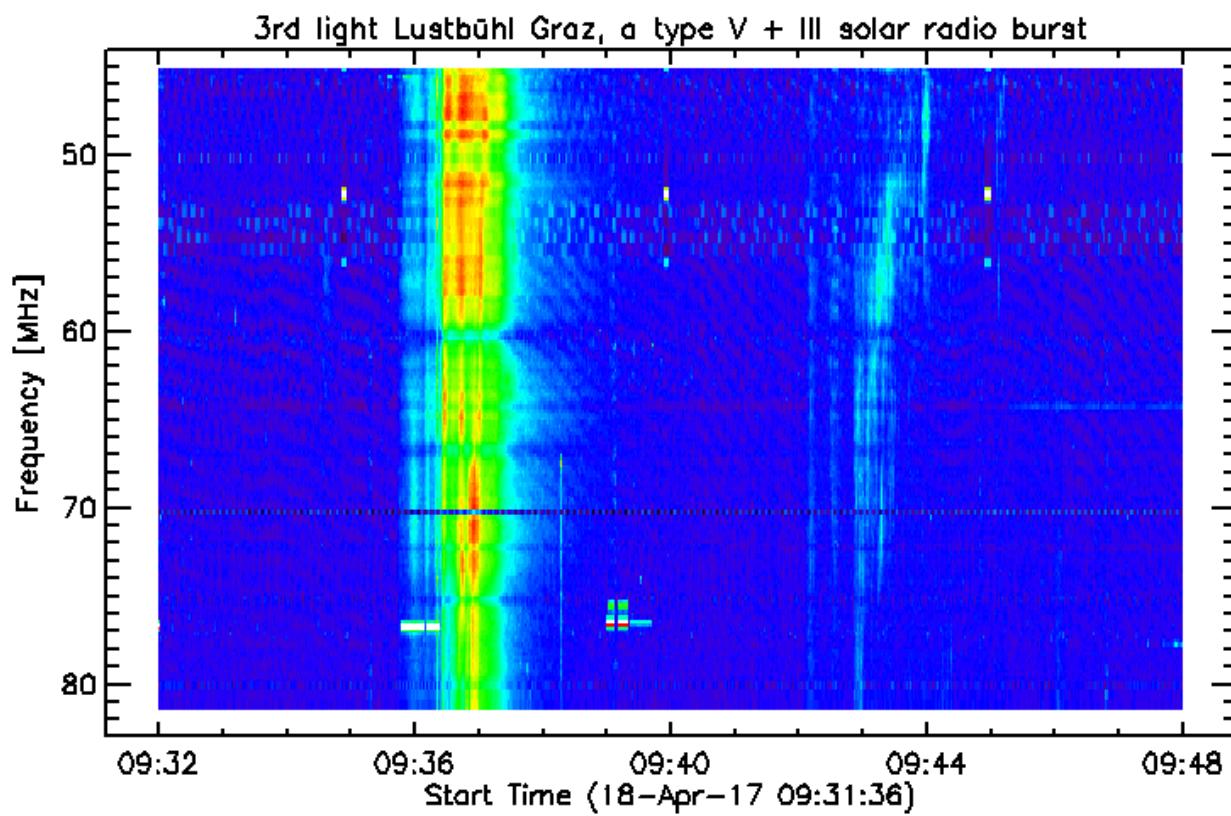

Fig 1: Two different burst types within a few minutes. For details see NOAA-list below.

## Oscillations in the 45-5000 MHz Radio Spectrum of the 18 April 2014 Flare

Marian Karlický, Ján Rybák and Christian Monstein published a paper, based among other data on Callisto data from GLASGOW, BLEIEN and ONDŘEJOV

## Success story sent in by Zulaikha Afandi et al from University of Malaya, Kuala Lumpur, Malaysia

I am writing this email to inform you that our research team (Electromagnetic Research Group) had participated in innovation competitions recently. The details are as follow:

1) Competition: Research and Innovation Week, 2017 (MPI2017). 12 – 13 Apr 2017.

Result : Gold Medal, see image below on page 3

Product : Burst-Finder: Automated Solar Radio Burst Detection for e-CALLISTO Spectra.

Project members: Nur Zulaikha Mohd Afandi , Roslan Umar, Nor Hazmin Sabri, Zainol Abidin Ibrahim, Christian Monstein & Zamri Zainal Abidin.

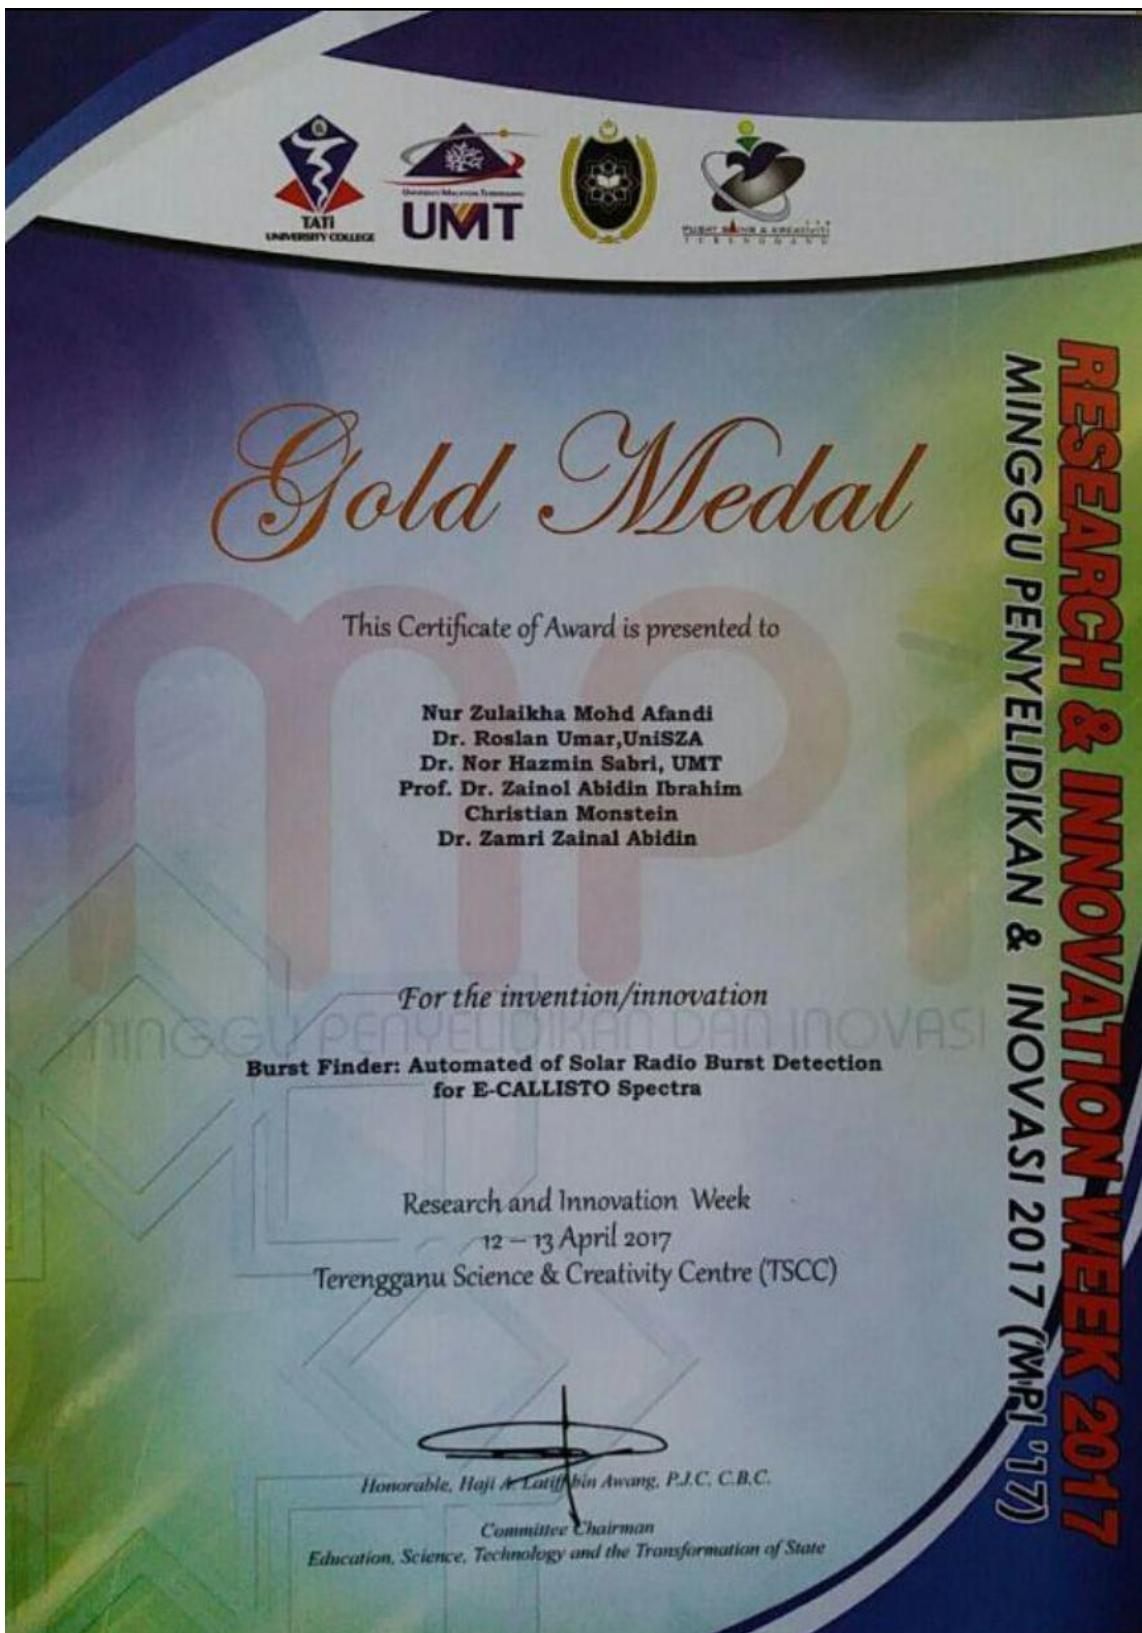

2) Competition: 28th International Invention, Innovation & Technology Exhibition. 11-13 May 2017.

Result : Gold Medal, see image below on page 4

Product : Burst-Finder: Automated Solar Radio Burst Detection for e-CALLISTO Spectra.

Project members: Nur Zulaikha Mohd Afandi , Roslan Umar, Nor Hazmin Sabri, Zainol Abidin Ibrahim, Christian Monstein & Zamri Zainal Abidin.

## CESRA news

The Community of European Solar Radio Astronomers (*CESRA*), currently represented by Eduard Kontar of University of Glasgow provides highlights of the solar community, called 'nuggets'. Here a few recent examples:

---

The Brightness Temperature of the Quiet Solar Chromosphere at 2.6 mm  
by Kazumasa Iwai et al  
<http://cesra.net/?p=1325>

---

Microwave emission as a proxy of CME speed in ICME forecasting  
by Carolina Salas Matamoros, Ludwig Klein and Gerard Trottet  
<http://cesra.net/?p=1336>

---

Comparison of alternative zebra-structure models in solar radio emission  
by G.P. Chernov et al.\*  
<http://cesra.net/?p=1341>

---

Multi-Loop Structure of Nonthermal Microwave Sources in a Major Long-Duration Flare  
by V. Grechnev et al.\*  
<http://cesra.net/?p=1375>

---

Particle acceleration and turbulence during a solar flare  
by E.P. Kontar et al.\*  
<http://cesra.net/?p=1409>

---

The 30 cm solar radio flux: a new proxy for upper atmosphere specification  
by Thierry Dudok de Wit and Sean Bruinsma  
<http://cesra.net/?p=1423>

  - [http://swe.ssa.esa.int/web/guest/GEN\\_1st](http://swe.ssa.esa.int/web/guest/GEN_1st)
  - You need to register first, then you can login for data retrieving
  - <http://swe.ssa.esa.int/web/guest/request-for-registration>
  - -----
- Status Callisto in different countries/locations unknown. Any information is very welcome. It would be nice if all countries could provide solar data to the network.
- Links for LPDA design:
  - <http://www.changpuak.ch/electronics/lpda.php>
  - <http://www.stroobandt.com/lpda/en/index.html>
- In case you plan to publish a paper based on e-Callisto data, please invite the observer and me as the PI of the network for co-authorship. This, according to the UN/ISWI resolution about data policy, addressed during the last UN/Japan workshop at Fukuoka University.
- CALLISTO or Callisto denotes to the spectrometer itself while e-Callisto denotes to the worldwide network.
- General information and data access here: <http://e-callisto.org/>
- e-Callisto data are hosted at Fachhochschule Nordwestschweiz (University of applied sciences FHNW) in Brugg/Windisch, Switzerland. Process control, user communication and scripts are conducted at institute for Astronomy, ETH Zurich.

Please do **not** respond to the email-address of the list-server, respond instead directly to me
